Description of Workcamp: CONC 073 03/08 ¿ 24/08 SAINT GEORGES DE POISIEUX RENO 18+ 12 VOLS

PROJECT: The partnership with the municipality of Saint-Georges-de-Poisieux will strengthen activities of conservation and protection of its heritage, initiated by a local association, as the fountain ¿ L¿Etang¿. The original building with a wooden roof was built on a re-emergence source. The water then flows into successive pools which were used as washhouse or drinking trough. This summer a first phase of work will give new life to this place surrounded by nature.

The elected representatives, the volunteers of associations and inhabitants of the municipality will welcome the volunteers for this first international workcamp.

WORK: Through traditional techniques of masonry, you will renovate the building of the former fountain-washhouse by restoring the outer walls: making joints with lime and construction of covering filler. You will work then on the renovation of tanks, by removing the vegetation and strengthening the present elements of masonries.

LOCATION: Saint-Georges-de-Poisieux is rural district of the Berry situated in the South of the department of Cher. Berry is an important agricultural region with a rich history. Placed in 70 km east of Châteauroux and 150 km in the North of Clermont-Ferrand this village tries to keep its picturesque side.

ACCOMMODATION: At the local stadium. Under tents for two persons (bring your own sleeping bag). The group life will take place in the local room of the stadium.

TERMINAL: Saint-Amand-Montrond train station. Airport: Paris.

SPECIAL REQUIREMENT: SCAFFOLDING CERTIFICATE. The nights could be cold, bring with you warm clothes and sleeping bag. Bring also a mattress, working clothes, gloves and shoes.
